# WHAT WE DO

---

## ▶ **Research**

Undertake independent, partnership and commissioned researches, assessments and evaluations for policy development, programme planning and MEAL, and advocacy purposes

## ▶ **Knowledge building and sharing**

Generate, repackage, and elevate CSOs experience and good practices including those in gender and inclusion, into shareable knowledge at local and national level, and contribute to regional and global discourses

## ▶ **Capacity strengthening**

Conduct tailor-made training, workshops, seminars, and conferences for CSOs, local governments, and national government agencies and ministries

## ► **Networking**

Catalise, establish, promote and actively contribute to CSO movements' hubs and grids at local, national and global level.

## ► **Convening**

Provide, share, and play active and leading roles in platforms for knowledge sharing and dissemination of emerging researches, addressing issues, positioning and negotiating CSOs' roles vis-a-vis government, international actors, and donors

# OUR CONTRIBUTION

[Click  
Here](#)

## ► **Localisation**

Provide evidence-bases to shed a light, to refine and to operationalise the concept of localisation to stimulate multi level debates concerning the global commitment towards strengthening local actors and the affected communities, promoting local networks and leaders including women leaders, and pursuing more equitable resource sharing

## ► **Knowledge Formation**

Distill and elevate experiences of local CSOs and governments into lessons learnt, references, and guidance for improving future locally-led disaster risk management and humanitarian response practices

## ► **Technical support**

Assist and strengthen the capacities communities, networks and local governments to implement disaster risk management and disaster emergency preparedness through more innovative approaches, inclusive and accountable while being more attuned to humanitarian principles.

## ► **Policy Development**

Actively being involve in articulating local perspectives in policy development and system building to advance the protection, inclusion and empowerment of women and vulnerable groups in disaster risk management, emergency and humanitarian response

## ► **Inclusive Risk Management**

Adopt and adapt the inclusivity principles, identify and address gaps, and support local actors operationalise them into practices along the commitment to "leave no one behind" as covered in the Agenda for Humanity concerning the gender equality, disability, and social inclusion.

## ► **Resilience Building**

Build and strengthen capacities of local actors and local governments' business processes in disaster risk management, emergency and humanitarian response through disaster risk reduction integration to local governance, national emergency response framework, disaster contingency planning, emergency operational planning, clusters coordination, etc.

## ► **Humanitarian Reform**

Collaborate in equal and mutually nurturing partnership with the Humanitarian Advisory Group (HAG) in the "Blueprint for Change" research series under the DFAT-funded Humanitarian Horizon, that has been catalyzing the various streams of local and national discourses on humanitarian response particularly the localisation agenda.
